

AD226 Diagnostic Audiometer

The portable true
hybrid audiometer

Interacoustics

Stationary or portable – you decide!

The AD226 is a powerful and fully portable hybrid audiometer.

A portable true hybrid audiometer

With the AD226 you can easily perform routine air and bone conduction threshold audiometry, but it also comes with multiple advanced features for other applications.

With a weight of only 2.9 lbs and compact footprint of only 12x9x4 inches, it is ideal for portable application as well as small office places.

Familiarity + functional design

The ergonomic design of the AD226 is exceptional with a high-resolution 4.3 inch color display that presents crystal clear images for easy to read audiograms. The familiar keypad design enables you to acclimate quickly without losing efficiency or speed.

A versatile True Hybrid audiometer

The AD226 is a fully self-contained standalone audiometer that can run independently from a computer. It is also a fully PC-integrated audiometer (with the optional Diagnostic Suite software) offering all the benefits of a PC-based audiometer with full Noah, OtoAccess™ and EMR/HIS integration.

The AD226 is small for portability, yet presents a high professional image. The power of the internal processor provides PC-like functionality without the PC. Upload multiple patient data into the AD226 before taking it on the road, then store test results to each specific client and download the information to the database program of your choice (NOAH, OtoAccess™) when you get back to the office.

- Air and bone conduction audiometry with pure tone, warble and pulsed tones, WN and NB masking
- Built-in talk forward microphone

A preview of the benefits

- Robust, fast, and easy to use
- Built-in graphical display
- Storage for 500 patients
- Only 2.9 lbs.
- Direct print to PC-printers
- Possibility to run on batteries
- Optional PC integration (hybrid mode) with OtoAccess™, Noah storage and EMR interface capabilities
